Problem 3

SIMPLE ARITHMETIC?

Your task is to perform simple arithmetic on two real numbers. The operations to be performed can be addition (+), subtraction (-), multiplication (*) or division (/).

The input file (DATA3) will contain five lines. Each line will contain two real numbers separated by an operation symbol. There will be no embedded spaces between the numbers and the operation symbol.

The output file (OUT3) will contain five lines of data, each representing the value, rounded to two decimal places, of the operation performed on the corresponding two numbers.

Sample Input (Only two lines given)

```
7.75*14  
8.25--16
```

Sample Output

```
108.50  
24.25
```
